

FOAM DISC PIG

THE FOAM DISC PIG is one of the most efficient liquids removal pigs available. The polyurethane foam body is molded with circular grooves across its body to provide a series of wiping edges. These grooves are coated with a polyurethane elastomer, which improve the wiping action and increase its wear resistance. Because of its unique multiple disc design, by-pass is minimal.

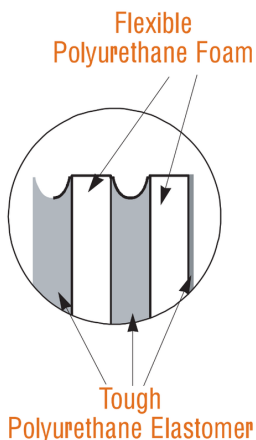

APPLICATIONS

- Removes Condensate from Wet Gas Systems
- Paraffin Removal in Crude Oil Pipelines
- Water Removal in Product Pipelines
- Grease Removal in Force Main Systems
- De-watering after Hydrostatic Testing
- Nitrogen Purge
- Product Recovery from Process Lines in the Food, Cosmetic, Paint, Lube Oil, and related industries

PROS

- Available in Medium and High Density Foam
- Bi-Directional
- Single Piece Construction
- Available with Pull Ropes, Cables, Nylon Straps and Transmitter Cavities
- Can be Configured for Multi-Dimensional Pipe
